About ELT India

Welcome to ELT India – a venture known for its path breaking innovations like Living Walls and Sustainable Light weight Roof Garden Systems. We are committed since our inception to the creation and delivery of eco-friendly products that blend harmoniously with nature.

Planting on roofs began in Europe but is now gaining popularity all over the world as more and more people are becoming aware of its eco-friendly qualities. Conventional roof gardens either restrict the planting to pots and planters or ordinary soil is spread onto roof surfaces, which always requires specially reinforced terrace or roof. ELT Easy Green® roof system provides a light weight, low maintenance roof system. It is designed with sustainability in mind where each component is either recycled or renewable to conserve our environment. Innovative water management is the key to the success of ELT Easy Green® roof system.

Product Features

Adaptable & Flexible

Can be installed on Terraces, Roofs or used for Lawns

Can Be Supplied Pre-Grown and Fully Established or Plantation Can Be Done At the Site

Civil Features Can Be Incorporated

Can Be Installed On Fabricated Structures Up To 45 Degrees Slope

Supports a Wide Range of Plantation from Lawns, Ground Covers, Shrubs and Also Trees

Light Weight & Low Maintenance Roof System

Highly Innovative
