About ELT India

ELT India has been formed to give India most innovative products like Living Walls & Roof Garden Systems.

Welcome to Ecogreen Landscape Technologies – a venture known for its path breaking innovations like Living Walls and Sustainable Light weight Roof Garden Systems. We are committed since our inception to the creation and delivering of eco-friendly products that blend harmoniously with nature.

The ELT Easy Green® living wall system has revolutionized the landscape and green building industry. The product is both, practical and efficient. These panels are light weight and easy to install. These panels can be mounted on the wall directly with the use of mounting strips. A built in irrigation system reduces maintenance and makes it more user friendly. The innovative system can be used indoor, outdoor, as a barrier or screen. Wide range of plants can be used to plant-in panels, depending upon the site conditions. ELT living wall modules are considered sustainable as they do not demand constant irrigation, are made from HDPE and at the end of their life, are 100% recyclable.

Product Features

Extensive Experience

Green walls measuring 50,000 square feet already installed Pan-India, Installation of over 25,000 square feet under way

Adaptable & Flexible

The base panels are modular in nature and of size 30 cm x 30 cm x 10 cm. The Living Walls can be created to any size (i.e. height x width)

The panels can be mounted directly on the walls, reducing the cost of installation

The panels can be installed on any surface having slope from 30 to 90 degrees and on both convex and concave curving surfaces

Highly Innovative

Growth medium is longevity enabled & change of growth medium is not required for many years

Water soluble nutrients are provided through drip irrigation system

Each planting cell has its own water reservoir & watering is not required to be done frequently

Panels have in-built irrigation system, which works on gravity and provides water to each cell of the panel

Eco-Friendly : Each Component is either Recyclable or Renewable
